SUMMARY

I've been building software for 5 years and still treat every project like a chance to learn and improve. I bring focus, discipline, and a deep respect for delivering real value to users and teams.

EXPERIENCE

Technical Director

Jun 2024 - Present

DELTA MULTIMEDIA FRANCE DMMF/D2MF

Remote

- Contributed to innovative projects across web and blockchain domains.
- Built MLRCoin — a custom token on the Solana blockchain.
- Involved in end-to-end development using modern tech stacks.

Senior Python Developer

May 2023 - Apr 2024

Nicheby, Delhi

Remote

- Delivered projects using Django, Celery, AWS, Redis, Docker, and MySQL.
- Led development of an AI-based interview preparation chatbot.
- Built a real-time chat system to boost user engagement.

Backend Developer

Apr 2023 - May 2023

Freelance

Remote

- Developed APIs and backend infrastructure for Alshifa Hospital.
- Worked closely with the team to gather requirements and deliver results.

Full Stack Developer

Feb 2021 - Mar 2023

Brototype, Kozhikode

Kerala, India

- Built projects using Django, React, HTML, and CSS.
- Contributed to an e-commerce platform and a social media app.

PROJECTS

MarketMates

2023 — Present

A social media platform for investors and stock enthusiasts. Built using Django (backend), React (frontend), and Flutter (mobile). This is my personal project — currently under development and soon to be launched.

E-cart

2021

An e-commerce site built with React and Django REST Framework. Includes JWT authentication, cart/order management, product reviews, and payment gateways like RazorPay and PayPal.
